Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☒ Responsive to communication(s) filed on 12 January 2004 and 03 February 2004.
- 2a) ☒ This action is **FINAL**. 2b) ☐ This action is non-final.

DETAILED ACTION

Claim Rejections - 35 USC § 112

Claims 20, 23, 24 are rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the enablement requirement. The claim(s) contains subject matter which was not described in the specification in such a way as to enable one skilled in the art to which it pertains, or with which it is most nearly connected, to make and/or use the invention. This rejection is made for the same reasons as the rejection of claims 9, 10, and 14 in the office action mailed 6/5/00, and the rejection of claims 29-31 in the office actions mailed 3/9/01 and 11/30/01. As previously discussed, practice of this invention requires the same cell(s) in an intact organism to take up both the T7-expressing MVA virus and the other vector encoding Dengue proteins, in a manner which expresses the Dengue antigens effective to induce an immune response. The prior art is limited to routine use of this method in cultured cells, and the specification provides little or no guidance to the artisan for how to use the technique in an intact organism. Selby et al (Journal of Virology 71: 7827-7831, October 1997, not available as prior art) provides evidence that simple injection of T7-expressing vaccinia and a separate plasmid does not succeed in producing an immune response; success "was completely dependent on mixing of plasmid DNA with DOTAP prior to immunization," see page 7828. Since the specification does not teach a step which proved critical for success, it is maintained that the invention as claimed is not enabled by the combination of the specification with the ordinary knowledge of those skilled in the art at the time the invention was made.

Art Unit: 1648

This rejection is reinstated because of applicant's reinstatement of pharmaceutical product and process claims depending from claim 27.

Claims 27, 28, 32, 39, and 40 remain allowable for reasons of record.

Conclusion

Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than **SIX MONTHS** from the date of this final action.
